E-mail: hugh.fairs@ntlworld.com

I have been working professionally as a freelance lighting cameraman and underwater cameraman for over twenty years, both in this country and on location abroad. I enjoy the challenges encountered daily working in diverse situations. I have great breadth of experience in many genres of film and television. My objective is always to capture the finest images possible.

I have extensive experience with a large range of cameras and camera applications including 16mm and 35mm film.

Video: HD, HDCam, Digi Beta, DVCam and mini cams. I recently designed my own deep sea underwater housing for the revolutionary RED ONE and Phantom Gold High Speed camera http://www.underwater-camera.com/site/RED_ONE_housing.pdf
